

Postoperative Rehabilitation Following Modified Brostrom-Gould Procedure

Name:			Date:
D	iagn	osis:	Date of Surgery:
	IMA	AFDIAT	TE PROTECTION PHASE (week 0-4)
ш	•	Goals	
		0	Protect healing tissue
		0	Decrease pain and inflammation
		0	Retard muscular atrophy
		0	Control weight-bearing forces
	•	Weigh	nt-bearing: partial weight-bearing in cast with 2 crutches for first 4 weeks
	•	ROM:	none
	•	NO IN	VERSION EXERCISES
	•	Exerc	
		0	No strengthening for first 4 weeks
		0	Begin submaximal isometrics at 4 weeks
		0	Hip abduction/adduction
		0	Straight leg raises into flexion
		0	Remove cast week 4 and place in cam walker
	Ph	ase II -	INTERMEDIATE PHASE (Week 4-12)
	•	Goals:	
		0	Protect healing tissue
		.0	Retard muscular atrophy
		0	Progress weight-bearing tolerance
		0	Begin proprioceptive drills
	•	Weigh	ntbearing:
		0	Weight-bearing as tolerated in cam walker weeks 4-8
		- 0	Discontinue cam walker at end of week 8
		0	Place in air cast for 3 additional weeks
	•	ROM:	begin passive dorsiflexion, plantarflexion and eversion
	•	No act	tive INVERSION past neutral for 12 weeks
	•	Begin	strengthening exercises
		0	PRE's at 75% of opposite LE (Theraband)
		0	Emphasize eversion and peroneal strengthening (Theraband)
		0	
	•	Week	6-8
		0	3-way Theraband isotonics (dorsiflexion, plantarflexion, eversion)
		0	Seated proprioceptive drills
		0	Leg press
		0	Knee extension
	•	Week	
		0	Vertical squats

o Side and front lungeso Lateral step-ups

Week 10-12

- o Standing proprioceptive drills
- o Stair climbing machine

Pool Program

- o. Swimming week 6-8
- o Fast-paced walking week 8-10
- o Running in pool week 10-12

Phase III -ADVANCED MOTION AND STRENGTHENING PHASE (Week 12-20)

- Goals:
 - o Progress to full motion
 - o Advance proprioceptive drills
 - o Increase strength, power, and endurance
 - o Gradually initiate sporting activities

Exercises

- o Continue strengthening exercises
- o Theraband strengthening inversion/eversion, dorsi/plantarflexion
- o Towel gathering
- o Standing toe-calf raises
- o Bicycle
- o Stairclimber
- o Vertical squats
- o Front lunges
- o Proprioceptive training

• Initiate Plyometric Program

- o Initiate:
 - Running program
 - Agility drills
 - Sport specific training and drills

Phase IV -RETURN TO ACTIVITY PHASE (Month 5-6)

Goals:

- o Continue to increase strength, power, and endurance of lower extremity
- o Gradual return to sport activities

Exercises

- Begin light running program
- o Continue isokinetic (light speed, full ROM)
- o Continue eccentrics
- o Continue mini squats/lateral step-ups
- o Continue closed kinetic rehabilitation
- Continue endurance exercises

D27

Phase V - Return (Goals 	to Activity (Month 5-6)		
o Advano	 Advance rehabilitation to competitive sports Achieve maximal strength and further enhance neuromuscular coordination and endurence 		
o Continu o Acceler	 Strengthening program Closed chain strengthening program Plyometric program Running and agility program rate sport specific training and drills
